

The logo for the National Flood Forum, featuring a stylized blue wave inside a circle, with a vertical line extending downwards from the right side of the circle.

National Flood Forum

Blue Pages

Welcome to the National Flood Forum's 'Blue Pages'

This is a directory of flood protection products and services put together to advise and inform you of the range of products available to help you protect your home or business against flooding. Whilst the National Flood Forum cannot endorse any of these products we are happy to provide a platform to enable the public to make informed decisions.

One word of caution: where there is a risk of flooding to a depth of more than 0.9m, keeping water out can sometimes do more harm than good. The pressure of water against your property may cause structural damage to the building itself.

The National Flood Forum recommends that you visit:

<http://www.environment-agency.gov.uk/subjects/flood/826674/882909/483622/484713/>

before purchasing any flood protection products. If you don't have access to the internet, phone Floodline on 0845 988 1188 and ask for a copy of their information booklets Preparing for a flood, During a flood and after a flood.

Mary Dhonau

The National Flood Forum

Registered Charity No. 1121642

Absorbeez

www.absorbeez.com

**PO Box 139
Upminster
Essex
RM14 2YD**

Tel 0500 51 00 52

The Absorbeez company manufactures rapidly deployed water absorbent bags of industrial quality. The bags are made in various sizes including ones to fit snugly between single or double doors or as sand bag alternatives.

They all absorb huge amounts of water for their size and can be built up as a barrier or placed to absorb water. No other bag range or product offers you the flexibility for deployment or value for money that Absorbeez does.

Acorn Group

**Acorn House
PO Box 930
Lincoln
LN5 5DL**

**Tel 0800 0358 999
Email sallen@zoom.co.uk**

When a crisis strikes we are on call 24/7, to provide a 'one stop shop' for your security requirements to both the affected premises, and any temporary accommodation.

Affected Premises

- Emergency boarding up
- Lock fitting, repairing, opening
- Asset management
- Assistance in listing

Temporary Accommodation

- Small works e.g. plumbing, electrics, joinery etc
- Premises adaptation for the less able bodied
- Intruder alarm systems (temporary and permanent)
- Glazing and general enabling

Domestic and Commercial work undertaken, staff CRB checked and Police vetted. Some staff BSL qualified.

Please call anytime to discuss your current requirements or how we may support your contingency plan.

Action Dry Emergency Services Ltd

www.actiondry.co.uk

**Action Dry Emergency Services
National Command Centre
PO Box 139
Upminster
Essex
RM14 2YD**

**Tel 0500 51 00 52
Fax 01708 507212**

Action Dry are an established independent flood damage mitigation company providing industry leading systems and processes, surpassing industry guidelines as set out in the British Standard PAS 64.

Our 'green cleaning' techniques are backed up by a validation process on appropriate works such as river or sewage flooding and prove the highest standard of clean has been achieved without the use of chemicals.

Our drying out methodology includes the WaterOut rapid drying system which dries out flooded properties in a fraction of the time associated with conventional dehumidifiers. All works include an environmental and structural monitoring program which records the drying program from start to finish. The information is presented to the principal, with a certificate of drying.

Aqua-Sac™

Asset Protection Through 'First Response'

What is Aqua-Sac™?... Answer! "PEACE OF MIND"

Aqua-Sac™ S.O.S bags are what every home and business should have in times of emergency if the property is located in an area at risk of flooding.

Everyone knows that sandbags when placed correctly provide an effective barrier against flood water. They are always seen being used as the first line of defence in any flood related news coverage.

The Aqua-Sac™ S.O.S bag needs 'no sand' therefore, storing 25-50 bags will take up no more space than a couple of thick folded blankets.

Aqua-Sac™ S.O.S bags simply provide the weapon you need!

Aquatite Systems Ltd

Panseal Pat No: EP04253558.3

The unique 'Aquatite Panseal' was specifically designed to protect against sewage backflow through downstairs toilets. Simply position 'Panseal' below toilet rim and inflate creating the required double seal.

Flood Panels

A lightweight and durable range of flood defence panels with their integral seal. Testing carried out by the 'Loss Prevention Council'.

Channel System

Provides a comprehensive flood defence for business and domestic properties. Can be installed inside garages.

Non-Return-Valve

Prevents 'backflow' through bath and shower drain pipes. Easy to fit, simply 'Push-On'.

Airbrick Covers

Aquatite Systems Ltd offer protection for both single and double airbricks.

Bauer Inner City are providers of demountable and temporary demountable flood defence systems

DEMFLLOOD™ System

This rapidly-deployed flood defence barrier is manufactured from high-quality extruded aluminium and stainless steel. The system consists of demountable posts set at predetermined centres with beams slotted in between them to the design height.

K-System

This is a fully-mobile temporary flood defence concept. It is constructed from lightweight aluminium; rapidly deployed prior to a flood event; its 'flat-pack' design enables quick and easy removal from site and into storage. The K System was awarded the BSI Kitemark PAS- 1188-2 in April 2006.

11 Market Hill
Royston
Hertfordshire
SG8 9JN

Tel 01763 244446
Fax 01763 244111
Email info@carofds.co.uk

The Caro Group have developed an easily mountable and demountable flood barrier WaterWall.

The system consists of posts that can be quickly inserted and locked into pre-fixed ground inserts. Panels are then dropped into place and, when the complete system is secured, seals ensure that water up to a height of 100cm can be held back or diverted.

The same Patented principle (Patent No. 2371068) is used in the easily installed WaterDoor system, to prevent ingress in through personal doors.

When a flood or any disaster strikes, just download the software onto a new machine and restore your files quickly. No hassle, no fuss - 100% reliable.

Easifit Ventguard

www.ventguard.co.uk

Tel: 01382 779706/477362
Email: sales@ventguard.co.uk

Easifit Ventguard is an instant fit airbrick flood seal . Requires no DIY work. Is a heavy duty high quality flood seal. All metal parts are precision made in stainless steel . Can be fitted to an airbrick in less than 30 seconds - just as easy to remove. Patented and tested, Easifit Ventguard creates a seal even on pebble dash walls. When fitted, the sealing membrane enters each aperture of the airbrick creating an excellent barrier to water. Can be used time and again. Available online

Eco Coverage Technologies

www.ecocoverage.co.uk

17 Newport Drive
Fishbourne
Chichester
West Sussex
PO19 3QQ

Tel 01243 786 015
Email info@ecocoverage.co.uk

Eco-coverage technologies Ltd present the world's first 'Fit and Forget' Airbrick flood protection device. The innovative design acts essentially as a standard airbrick allowing unrestricted airflow underneath the property, yet under flood conditions uses the rising water to automatically shut off, inhibiting access through the airbricks and therefore flooding underneath the property. Unlike sand bags and covers no flood warning or pre flood intervention is required.

The BBA endorsed 'SMART' Airbrick requires no external power supply to operate and can be easily cleaned post flooding, providing protection 24/7 over and over again.

Eco Sound Home Products Ltd

Floodblock

www.floodblock.co.uk

A trading division of Just Ethical Ltd

**Unit 10 Swinborne Court
Burnt Mills Industrial Estate
Basildon
Essex
SS13 1QA**

Tel 0800 0 78 79 80
Fax 01268 455619
Email info@floodblock.co.uk

Floodblock provides a **complete** flood protection system for home or business.

All parts are custom made after a site survey. We can protect all doors (including garage and any size of patio door), air bricks, meter cupboards, toilets, showers etc. Remember a house is not protected if the walls are not fully waterproofed, we chemically treat the walls.

Cavity walls and wooden floors can be protected from the U tube effect with water pumps.

Floodblock supplies and fits the Floodwall system. The fully patented system has been used on grade 2 listed buildings and by Lewes Council.

When receiving a flood warning all parts can be fitted in minutes.

Floodgate – The Unique Flood Protection System

First launched over a decade ago, Floodgate is one of the leading suppliers of flood protection door barriers in the UK.

We provide flood protection solutions to the Environment Agency, local councils, housing associations, the construction industry, water utility companies as well as, the general public.

Floodgates are seen as a superior and cost effective replacement to ineffectual sandbagging and, as they do not require any fittings to the property, can be installed in most doorways with little or no remedial work required. All products are manufactured to BSI standards.

Hesco Concertainer® Bastion Flood Defence Units

Concertainers® are a patented system, manufactured from galvan coated welded wire mesh panels. The panels are joined by coil hinges and the units are lined with a strong durable geotextile.

The advantages of the Concertainer® system are: Rapidly erected. Cost effective. Re-usable. Inherently strong. High quality components. Fully collapsible for transportation & storage. Range of stock sizes.

To build a wall 1metre high by 1 metre wide by 10 metres long: 10 men filling 1500 sand bags, 7 hours. 2 men using Concertainer®, 20 minutes. Concertainer® could tip the balance between minimal flood damage or a demoralising clean up operation.

Ideal Group

ME14 3LY

Tel 0800 0858 986
24hr emergency call out
Fax: 01622 735 097
Email: info@idealgroupuk.co.uk

The Ideal Group is the UK's leading emergency restoration company for properties damaged by flood, fire or disaster.

As the only UK company with all four rapid-drying systems: Arid Air, Dry Air, WaterOut and TES, we can dry both small and large buildings up to seven times faster than conventional DRYING methods - faster than anyone else.

We respond to emergency calls immediately reducing the amount of damage and the time away from the property. We can act quickly when time is critical.

Our rapid-drying enabled Sydney Smith School to re-open much sooner than expected following the summer floods in Hull in 2007.

We also provide commercial and domestic cleaning and restoration services, decontamination, thermal sanitation, trauma scene cleaning, temporary heating and pest elimination.

Instant Water Barrier

THE INSTANT WATER BARRIER bag is a clean, lightweight, easy to use alternative to the traditional sandbag.

The 20 litre bag (420mm x 570mm) weighs 200g when dry and will absorb up to 20 litres of water in a matter of minutes. The fully soaked bag weighs approximately 20kilos and acts as a water barrier or water diversion bag. It does the same job as a traditional sandbag but without any of the problems associated with handling, transportation and storage. The lightweight bag (200g) can be handled quickly and easily by anyone. It is easy to store and transport. (Flat packed 500 weigh approx 100 kilos and take up only 1.1 cubic metre of storage space)

FLAT & LIGHT FOR STORAGE - SOLID BARRIER WHEN FULL

Ideal for extreme weather elements, floods, leaks, burst pipes, spills and much more.

Mission Rubber supplies the following products for use in flood protection schemes.

Non-Return Valves

A complete range of inline non-return (anti flood) valves to prevent backflow into the property through the drainage system. Available in sizes from 40mm diameter for internal wastewater pipes, to 500mm diameter for main sewers.

Sizes up to 200mm diameter comply with the requirements of the Building Regulations, Approved Document H.

Flap Valves

A range of lightweight but durable g.r.p. flap valves from 100mm to 1500mm diameter including valves which can be fitted direct to the end of an outfall pipe.

Flexible Couplings

A range of couplings and adaptors up to 2000mm diameter for the repair and adaption of drains and sewers aswell as the installation of non-return and flap valves.

Protectahome

 Fax 01342 324 852

Email emergencyclean@rentokil-hygiene.co.uk

The Specialist Disinfection Service from Rentokil Hygiene is a unique and reliable cleaning service for extreme situations. It has been specifically designed to tackle difficult or hazardous cleaning problems safely, legally and discreetly.

This service is an essential facility utilised by local government departments and authorities, commercial organisations and insurance companies after flood damage or sewage spills.

We ensure that the areas affected are made free and safe from contamination in preparation of further repair works, we will provide documentation and certification to prove that the work has been carried out.

We offer a nationwide, 24/7 service with trained technicians and specialist equipment.

Total Flood Solutions

Email info@totalfloodsolutions.com

Total Flood Solutions provide complete flood alleviation schemes for a variety of existing domestic, commercial, utility and industrial premises as well as new build developments.

Solutions utilise our kite marked building skirt system, door dam systems, veneer walling and ancillary products to minimise flood consequences from 'flash' flood, runoff, drainage surcharge, prolonged flood and groundwater flooding.

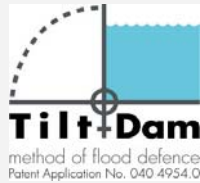

The company also provides a full flood Survey and Flood Risk Assessment service to identify the problems, and design and implement effective practical solutions using our own staff. This includes PPS25 applications and solutions.

Complete installations undertaken to date all benefit from having obtained property flood insurance on competitive terms, even those that were previously uninsured for flood risk.

Why not give us a call to see how we can help solve your flood problem.

TILT-DAM Ltd

www.tilt-dam.co.uk

**3 Howe Drive
Beaconsfield
Bucks
HP9 2BG**

Contact Jim Barrack

Tel 01494 67 23 23

Mob 07841 83 03 93

Email jim@tiltdam.co.uk

TILT-DAM is a unique, permanently installed, demountable flood defence - a trench with counterbalanced tilting lid. From being a path or roadway, the lid is rotated by hand to the vertical, forming a defence wall with perimeter seals. TILT-DAM can be a single unit at an access point or a series forming an extended wall.

It is quick and easy to mobilise, nothing to "fetch and carry" and no motive power required. The design principles are reliability, safety, simplicity, robustness, rapid mobilisation and easy maintenance. There is a demonstration installation at Lea Marston near Birmingham.

In spring 2008, a major installation, arising from the 2007 summer floods, was completed in Sheffield as part of the perimeter protection to a commercial office block.

UK Flood Control Limited

Email: info@ukfloodbarriers.co.uk

Don't be fooled by large DIY companies claiming that a few door barriers provide a complete flood defence system - they can't. Even a small amount of water in your home or business can cause untold damage, and hike up insurance premiums to ridiculous prices. UK Flood Barriers have developed innovative systems including easy assemble flood shield barriers for doors, intelligent valves to stop sewage and spoiled water running back into your property and the Smart Air Brick, a new development that blocks water.

With just a few minutes installation customers will receive piece of mind in heavy rain.
