

Seasonal Pest Calendar

Pests can be a problem all year round. However, there are some pests which are a problem at certain times around the year for a short amount of time.

Please see the calendar below to see which pests are most likely to effect residents at this time of the year.

| | January | February | March | April | May | June | July | August | September | October | November | December |
|-------------------------|-------------|-------------|-------------|--------------|--------------|--------------|--------------|--------------|-------------|-------------|-------------|-------------|
| Ants* | Not Active | Not Active | Not Active | Not Active | Not Active | Not Active | Active Time | Peak Time | Active Time | Not Active | Not Active | Not Active |
| Honey Bee Swarms | Not Active | Not Active | Not Active | Active Time | Peak Time | Active Time | Not Active | Not Active | Not Active | Not Active | Not Active | Not Active |
| Rats** | Active Time | Active Time | Active Time | Low Activity | Low Activity | Low Activity | Low Activity | Low Activity | Active Time | Active Time | Active Time | Active Time |
| Wasps | Not Active | Not Active | Not Active | Not Active | Active Time | Active Time | Active Time | Peak Time | Peak Time | Active Time | Active Time | Not Active |

* - This relates to Swarming ants. Ant infestations could appear at any time of the year.

** - This relates to Rats seeking shelter for the winter. Rats could be a problem at anytime of the year.
